

Pins Her Faith

Mrs. Ruth Snyder Says Governor Can Appreciate Her Case More Than Himself—Dr. Neumann, Chicago Psychiatrist Summoned by Hazelton.

New York, Nov. 28 (AP).—Open Dr. Clarence J. Neumann, Chicago, psychiatrist who treated for Leopold and Loeb, today defended the "feminine" hope of saving from death Mrs. Ruth Snyder, convicted with Henry Judd Gray of the murder of her husband.

Suppressed pages of the confessions of Gray and Mrs. Snyder, were regarded by counsel appearing with material for Dr. Neumann, summoned here in a last minute attempt by Attorney Edgar E. Hazelton to set up a parallel between the Snyder slaying and the murder of 14-year-old Bobby Franks, for which Leopold and Loeb escaped the death penalty.

On the basis of Dr. Neumann's conclusions and the confessions and the psycho-analysis of Mrs. Snyder, Hazelton hopes to be enabled to argue before Governor Smith that Mrs. Smith was impelled to the crime by influences that overpowered her conception of right and wrong.

While her counsel turned to psycho-analysis, Mrs. Snyder, in Sing Sing prison, based her hopes on Governor Smith's kindness. "I am going to put my faith upon the governor," she said. "He is a human-being. He can appreciate my case even more than I can because I am in the middle of it."

She did not mind being put to death, she said, because she had died "a thousand deaths" in prison, but

D-1230 Will Not

Fly to America

Junkers Plane En Route From Germany to United States Bent Its Propeller in an Attempt to Take Off For Newfoundland.

Horta, Island of Fayal, Azores, Nov. 28 (AP).—The Junkers plane D-1230, en route from Germany to the United States bent its last propeller in an attempt to take off for Harbor Grace, Newfoundland, at four o'clock this morning.

"Now it's all over," Lilli Dillenz, Viennese actress, who is a passenger aboard the plane, said as she stepped ashore smoking in her flying suit. Smiling, she added: "Our last propeller has been bent."

The plane did not succeed in rising from the water despite good sea and wind conditions.

Will Give Up Attempt.

Berlin, Nov. 28 (AP).—The crew of the Junkers plane D-1230 now at Horta, Island of Fayal, Azores, has decided to give up their attempt to fly to America this year. The Junkers Company announced today.

The crew, which failed again this morning to take off for Newfoundland, found the sea swell too strong, was said.

Begin Decoration

Of Uptown Streets

The program of decorations planned by the Uptown Business Men's

association for the Christmas holiday season is rapidly taking form. For several days past a crew of electricians has been busy stringing wires for the special Christmas lighting and today a crew is busy putting up the Christmas trees which will be a part of the decorating. A large ornamentation of trees has arrived and they are being erected throughout the business section similar to the display of last year. Plans this year call for an even more elaborate decoration plan than last season.

With the street decorations taking form and the huge display of Christmas merchandise on display, people are reminded that the holiday season is near. There are but twenty-three more shopping days to Christmas and every merchant advises shopping early while the stock of merchandise is complete and before the last minute rush is on.

MISS LEICRAFT KNOCKED
DOWN BY AUTO ON SUNDAY.

Aloysius Bailey of 116 Greenhall
avenue reported to the police that
Sunday afternoon about 1:30 o'clock

the Ford truck he was driving knocked down Miss Leacock of 150 Manor avenue at the corner of Albany avenue and East St. James street. In reporting the accident, Bailey stated that as he approached the crosswalk the young woman was about to cross and he attempted to drive between her and the curb, when she evidently became confused and ran back toward the curb and was knocked down. She was bruised about the body, but her injuries were said not to be serious.

—♦—

Secures Position.

Miss Mildred Briak, a graduate of the shorthand department of Spencer's Business School, 227-23 Fair street, has secured a permanent position as stenographer, typist and office assistant with Gregory & Company, 661 Broadway, this city.

28 Killed, 71 Hurt,
Toll of Hunting

Season's Toll of Hunting Accidents Was Heavy—11 Killed by Own Guns—Many Hunters Shot by Companions—Guns Killed in Mistake for Deer.

Albany, Nov. 28.—Twenty-eight died and seventy-one people were injured as a result of hunting accidents between October 15 and November 20, according to figures compiled by the Conservation Department.

This is the largest number of hunting casualties reported in any one year of the past five, with the exception of 1925 when the total number of accidents was 115—29 killed and 66 injured.

During the years 1923 to 1926, inclusive, hunting accidents averaged at the rate of 92 a year. The average number killed was 20, and the average number injured was 64, as follows:

1927—28 killed, 71 injured.
1926—15 killed, 62 injured.
1925—29 killed, 86 injured.
1924—19 killed, 54 injured.
1923—20 killed, 77 injured.

This season 14 hunters were killed by being shot by their own guns.

Twelve hunters were killed by guns in the hands of their companions.

Eleven deer hunters were injured by the accidental discharge of their own guns or the guns of companions.

Seventeen hunters were injured while shooting game birds and animals by the discharge of their own guns, and 30 hunters by the discharge of guns in the hands of their companions.

Nine hunters were injured by being struck by stray bullets, either in the woods or while walking along the highway.

One guide was mistaken for a deer by a member of his own party and was killed.

The shortest list of hunting casualties in the last five years covered the year 1921 when the hunting season in the Adirondacks and Catskills was curtailed two weeks by the closing of the woods because of an extensive fire hazard, and it is probably safe to say that the determining factor in the number of hunting accidents is the number of hunters in the field. This year from the reports of guides, game protectors and others the number of hunters afield was probably much larger than in any preceding year.

Practically all of these accidents could have been avoided by a thorough knowledge of fire arms and care in their use.

Those killed were:

Karl Drent, Amsterdam, deer hunting, shot by own gun.

Burr Standish, Silver Springs, bird hunting, shot with own gun.

Arthur Copes, Bacon Hill, bird hunting, shot with own gun.

Ralph Elghmie, Hughsonville, game hunting, shot by own gun.

Harold Smith, Endicott, deer hunting, shot by companion.

Anthony Mullaney, Albany, game hunting, shot by own gun.

Adolph Vink, Churchville, pheasant hunting, shot by companion.

Henry J. Kline, Ripley, game hunting, shot by own gun.

Anthony Codignotto, Syracuse, duck hunting, shot by own gun.

Francis Steenrod, Roscoe, rabbit hunting, shot by own gun.

Thomas Darrett, Old Forge, bear hunting, shot by companion.

John G. Ball, Willow Point, rabbit hunting, shot by companion.

Charles Ducharme, Merrill, deer hunting, shot by companion.

Luther Sanford, Crystal Lake, game hunting, shot by companion.

Charles Truno, Rochester, pheasant hunting, shot by own gun.

William Pierce, Carthage, deer hunting, shot by companion.

Charles Rogers, Whitney Point, duck hunting, shot by own gun.

Albert Miller, Valatie, rabbit hunting, shot by companion.

Lawrence Lavish, Haverstraw, game hunting, shot by own gun.

Leonard Tribunella, Buffalo, pheasant hunting, shot by companion.

Elliott Rahle, Syracuse, rabbit hunting, shot by hunter.

George Gorette, New York city, duck hunting, shot by own gun.

Jay Legg, South Otsego, game hunting, shot by companion.

Jacob Samoski, Dunkirk, game hunting, shot by own gun.

Gordon DeLongue, Ilion, duck hunting, shot by own gun.

Walter McGaree, Old Forge, guiding, shot by hunter.

Philip Croad, Herkimer, rabbit hunting, shot by companion.

George A. Timian, Syracuse, pheasant hunting, died of heart disease.

Check Was Inside

A farmer's son went to the post office and brought home to his father at Garfield, Mont., a letter containing a check for \$37.21 in settlement for a mislaid shipment.

Unfortunately dead dropped the letter with the check within the reach of a pet lamb and the best he could do was to rescue the envelope. Returning what was left to the claim agent of the express company, he wrote:

"Can't you stop payment on that check and issue another and I give you a statement that the check was destroyed?"

Then he added: "The lamb is still alive and has \$37.21 on deposit."—Human Interest.

Give Good for Evil

It is no excuse for killing time to say that time will eventually do that to you.

ASTHMA

No cure for it, but welcome relief in other brought by—

VICK'S

Over 17 million have found relief.

Young Father: "That luminous point I just bought is a splendid invention."

Back-for Friend: "What do you use it for?"

"We point the baby's face so that we can give him his bottle during the night without turning on the light."

"Would you believe it? That girl follows all the beauty hints she reads."

"Well, she certainly is a long way behind them."

Our heart goes out to the man who joined the navy to see the world and then spent four years in a submarine.

A colored cook came home after midnight from a revival meeting shouting at the top of her voice. Her employer, letting her in, said: "Aunt Mandy, this is all foolishness. Religion shouldn't be so noisy. Tell that preacher of yours to give a sermon on the building of King Solomon's temple, which arose without even the sound of a hammer. And remember that real religion is quiet and peaceful."

"Lawd, honey," answered Aunt Mandy, "us niggers ain't aimin' to buildin' no temple yit. We is jes' blasin' now."

Oddfellow: One who can't drive an automobile.

Millions for citizens' military training camps but not one cent for citizens' peace camps.

Life is one dingbusted thing after another and so is the news of the day.

Speaking of heredity: Said the flapper after she had introduced her new boy friend to her parents, "What side of the family do you think I take after?"

"Well, you have your father's eyes, nose and mouth," the B. F. replied, "but you get your legs from your mother."

A man is also known by the color his wife makes him paint the house.

Many of us leave footprints in the sands of time, but few of us leave small ones.

In heaven they may be older but on earth angels are never over six or eight years old.

The tragedy of a flea is, that he knows for a certainty that his children will all go to the dogs.

It has been our observation that a radio set is like a lot of other things. It is all right—when it works.

Josephine—"Are they engaged?" Georgianna—"Not yet. He still buys orchestra seats when they go to a show."

A sense of responsibility is good for a boy. If there's nothing else you can do, get him a pair of white pants.

The trouble with so many people is that they are looking for a white soft collar job.

When Old Mother Hubbard goes to the cupboard nowadays, it is to get herself some rouge.

News From the World on Wheels

Introduction of the new Whippet Cabriolet Coupe, an addition to the Whippet line of cars, is announced this week by the Willys-Overland Company. Unique features are embraced in the design of this new model which strike a new and distinctive note of style. This is the first two-type Cabriolet Coupe to be offered in the light car field and is included in the Whippet Six line as well. Mounted on the low swing Whippet chassis, the body as a whole presents a trim and sporty appearance. In addition, it provides the protection of a closed car together with the freedom of an open roadster. Four passengers are easily accommodated, two in the front seat and two in the rumble seat which is built into the rear deck.

More than 3,000 cars bought, 45,000 demonstrations given and more than 500,000 visitors attracted to the salesrooms of its distributors and dealers, is the estimate of R. S. Cole, general sales manager of the Hupp Motor Car Corporation, of the reception accorded the new Huppobile 1928 Six by the public during the first four days following its announcement. The figures for buying, demonstrations and public attendance each surpass those for the presentation of any previous Huppobile, says Mr. Cole. They were compiled from nearly a thousand enthusiastic congratulatory telegrams received from Huppobile owners of long standing, from the general public and from distributors and dealers. Presentation of the new car to the public is still in progress in various sections of the country.

Following the advanced mode in body design and color harmonies, Chandler announces an attractive new model, called the Special Six De Luxe Sedan. It is done in two-tone fawn with fenders and mud splashes finished in fawn to match the body. The elimination of the prosaic black from the fenders greatly enhances the appearance of this new creation. And another outstanding feature with this new model is that instead

News From the World on Wheels

of having the regular artillery type wood wheels, wire wheels are standard. The method of mounting the extra wheels directly back of the front fenders (which are recessed to provide the proper position) afford an appearance of a custom built model.

With 15 different standard body types on three different chassis the Packard Motor Car Company now also has 21 different custom body types available, with a limitless selection of color and interior trim. Custom bodies are from the shops of the best known custom body builders of the United States. Numbered among the new Packard custom bodies are several new town cars which have attracted much attention. There also is an unusually smart sport touring car and a very considerably improved convertible coupe.

Listener Not Taking Anything for Granted

A big mass meeting was being held in Billville.

The well-groomed and sleek-looking individual who was trying to separate the town from its money arose to make a few remarks.

"Fellow citizens," he opened up, "apropos—"

"Just a minute, mister," said a smallish, sandy-whiskered man. A look of annoyance crossed the speaker's face.

"What can I do for you?" he asked. "I have here a pocket edition of Webster's dictionary and I want to look up that word 'apropos.' I don't intend to sit here and let some oily-tongued stranger slip one over on us."

"Oh, that'll be all right," replied the speaker. "Now, that word to which you refer means—"

"Never mind what it means," enjoined the little man. "I'm looking it up. I let a smooth talker sell me a unicycle one time. He said it was the last word in conveyances, and when I paid the freight on it from Chicago, I found I had purchased a wheelbarrow." — St. Louis Globe-Democrat.

Goes Far Back

The expression "God helps those who help themselves" is merely a modern version of a thought uttered 400 years before the Christian era by Euripides, a famous Greek tragic poet. The same idea is found in the writings of many later authors.

"Yes, we'll be home"

BEFORE TRAGEDY ENTERED DOOR

Interesting photo is party group taken at George Brown's mansion when all were in family of "King of the Brotherhood." In center, the wife of George Brown, her brother, is seated back of her, with his arm extended on George's chair. Brown is now an important person against the wealthy liquor-runners. (International Illustrated News)

VAGARIES

It is more blessed to receive than to ask in vain.

The average man wastes too much time feeling sorry for himself.

Noble birth is one thing and a nice, soft political berth is another.

A youth always wishes he were older and a woman always wishes she were younger.

HANDY ABOUT HOUSE

Tongs for lifting lumps are attached to the cover of a new sugar bowl.

Lifting the handles on a new steam-pressure cooker releases the top from the bottom.

Ventilation at the back of a new electric flatiron keeps the top and handle cool.

An inventor has invented a tool for cutting open pasteboard cartons neatly and quickly.

A heating radiator has been invented that will burn any kind of oil not too heavy to flow.

With a new device sets of bristles are passed through a comb from opposite sides to clean it.

Heating elements have been inserted in the cover of an electric cooker to brown the top of foods.

Notches of a new space-saving rack for garment hangers prevent the latter sliding together or falling off.

A Colorado woman is the designer of a small dining table that when turned on one end becomes a step-ladder.

A new tray for holding beverage glasses and smokers' articles can be clamped to the edge of a card table, desk or flat-topped chair.

Tongs with which dishes can be handled while being washed without wetting a person's hands have won a patent for their inventor.

CLEANLINESS

Cleanliness of body was ever deemed to proceed from a due reverence to God.—Bacon.

So great is the effect of cleanliness upon man that it extends even to his moral character.—Rumford.

Early rising and much bathing are profitable to keep a man in health and to increase his riches and wisdom.—Plato.

Optimists look forward to the virtual extinction of disease, but it will only be after children are taught cleanly habits from the very first, brought up in clean houses, and sent to clean schoolhouses through clean streets.—Ellen H. Richards, "The Cost of Cleanliness."

INDUSTRIAL

New wireless stations will replace the existing ones on the Cairo-Khartoum route for the guidance of passenger aircraft.

An English inventor claims to have improved the quality of steel by subjecting it to explosive shocks while in molten state.

The United States last year produced more petroleum than ever before, the output being estimated at 74,000,000 barrels.

In an experimental way granular or sponge iron is being produced directly from ore without the aid of a blast furnace in an Ohio plant.

Why He Is Unpopular
Many a man is on such good terms with himself that he never thinks of being pleasant to anybody else.

WORTH RECORDING

I have a heart with room for every joy.—Dante.

The man of wisdom is the man of years.—Young.

For he that once is good is ever great.—Ben Jonson.

There is no grief which time does not lessen and soften.—Cicero.

Systems exercise the mind, but faith enlightens and guides it.—Voltaire.

Strengthen me by sympathizing with my strength, not my weakness.—Alcott.

Remembrances embellish life, but forgetfulness alone makes it possible.—Chadwin.

Those gifts are ever the most acceptable which the giver makes precious.—Ovid.

Let us a little permit Nature to take her own way; she better understands her own affairs than we.—Montaigne.

Sow an act and you reap a habit. Sow a habit and you reap a character. Sow a character and reap a destiny.—Reade.

Make Nightly Climb to Rocky Stronghold

What is believed to be the oldest town in America is, Acoma, situated on top of a great rock that stands 350 feet above the surrounding country in New Mexico. It was in existence 300 years ago when the first Spanish missionaries came into the country. Acoma is the most picturesque of the three pueblos of the Laguna Indians visited by the party of Jesse L. Nusbaum, archeologist, and described by Deric Nusbaum, the scientist's son, in St. Nicholas Magazine. Clinging to their ancestors' distrust of all strangers, the Indians refuse to give up the ancestral defense afforded by the barely accessible rock. In the valley below, at the foot of the rock, they stable the horses with which they work their farms, but every human habitation is reached by the 350-foot climb up steep steps cut into the rock. The village itself is made up of two streets of stone and clay houses two and three stories high, the upper floors being reached by ladders from the lower. All of the building materials, even the great wooden beams of the church, one of the oldest of the Spanish missions, have been carried up on human pack trains after having been transported across the country for distances as great as 20 miles.

"Father of Medicine" Was Well Grounded

Hippocrates gets his name carved on the friezes of libraries as the father of medicine, but probably few who see it there realize the great extent of his knowledge of that science or the cycle that the practice of medicine has traveled in the 2302 years since the famous Greek died. His general ideas are those held by the most advanced medical men today. He placed a strong reliance on the recuperative powers of the body to eliminate or overcome disorders even of the serious kind if aided by proper regimen and improved environment. With this was coupled an equally strong disinclination to interfere with the normal functions of the organism by the administration of drugs.

Thus, his prescriptions often ordered merely a change of climate, or an altered or limited diet, or the securing of conditions that would provide absolute quiet and long hours of sleep. Frequent bathing of the entire body, sometimes in cold, and at others in warm or hot water, was also a favorite method adopted. It is held probable that this sensible system brought him the high reputation accorded him by contemporaries.—Kansas City Star.

Tree's Peculiarity

The red cedar is an evergreen which grows to a large size. It often has two kinds of leaves on the same tree. One kind is dainty and fernlike, and the other has short broad prickles.

State Is Buying Nine Mountains

West of Marcy, Skyline, Redfield, Albany, Grey Peak, Chitt. Dis. Macomb and Mt. Marshall Added to the Forest Preserve.

Albany, Nov. 24.—More than 6,000 acres of land in the vicinity of Mt. Marcy with great recreational and scientific possibilities will be added to the Adirondack forest preserve just as soon as title to the various parcels are approved by the state legislature.

On the recommendation of Commissioner MacDonald, the Board of Commissioners of the Land Office have approved the purchase of 1,000 acres lying in Essex county in the high mountain region. The lands approved are intermingled with other state holdings southeast of Mt. Marcy and upon the Elk Lake watershed.

The greater part of the area approved for purchase lies upon the upper steep slopes of Mt. Marcy, Skyline, Redfield, Albany, Grey Peak, Chitt. Dis. Macomb and Mt. Marshall, all of which are over 1,000 feet in height. The addition of these lands to the forest preserve will place in state ownership the entire slopes of all the mountains named above, except this where the remaining area is owned by a private park.

Upon the area recommended for purchase is Lake Tear-of-the-Clouds, the highest lake source of the Hudson river, and the major portion of Feldspar and Uphill Brooks, together with other upper sources of the Otsego, Ausable and Hudson rivers. A considerable portion of the land is forested with a heavy stand of virgin soft wood timber, the lumbering of which had been planned for the immediate future by the owners.

The lands acquired are considered especially important on account of their scenic and recreational value as well as for the reason that they will block out the present state holdings, and provide a regular boundary line for administrative purposes.

NEW YORK HUNTERS SEEK BRUIN IN PENNSYLVANIA.

Olean, N. Y., Nov. 28 (P).—“Loaded for bear”, hunters are flocking into the Allegheny Mountains, with scores daily crossing the border near here from New York state. Bruin the mighty would do well to stay on the bearish equivalent to his own front porch until December 15, for bear steaks have been promised in many homes throughout Pennsylvania and southwestern New York.

The bear season in New York which closed on November 15 found the animals far from plentiful and a limited catch was reported. Hunters are given ten days before filing reports, and the official count is not, therefore, obtainable from the Conservation Commission, but it is not expected to be heavy. Redfield, N. Y., where several parties were successful in tracking down and shooting the ambulating black bear, proved the best territory for the sport in this state.

However, the rocky Allegheny furnish an ideal natural habitat for Bruin. Madame Bruin and the little Bruinettes, bears being as plentiful in the Pennsylvania hills as deer in the Adirondacks. Each hunter is allowed one animal with the year-old bear cubs protected.

The Pennsylvania game laws require single shot guns, and deadfalls, pens and traps are forbidden.

AVOID UGLY PIMPLES

A pimply face will not embarrass you much longer if you get a package of Dr. Edwards' Olive Tablets. The skin should begin to clear after you have taken the tablets a few nights.

Cleanse the blood, bowels and liver with Dr. Edwards' Olive Tablets, the successful substitute for calomel; there's no sickness or pain after taking them. Dr. Edwards' Olive Tablets do that which calomel does, and just as effectively, but their action is gentle and safe instead of severe and irritating.

No one who takes Olive Tablets is ever cursed with a “dark brown taste,” a bad breath, a dull, listless, “no good” feeling, constipation, torpid liver, bad disposition or pimply face.

Olive Tablets are a purely vegetable compound mixed with olive oil; know them by their olive color.

Dr. Edwards spent years among patients afflicted with liver and bowel complaints and Olive Tablets are the immensely effective result. Taken nightly for a week. See how much better you feel and look. 15c, 30c, 60c.

A Raw, Sore Throat

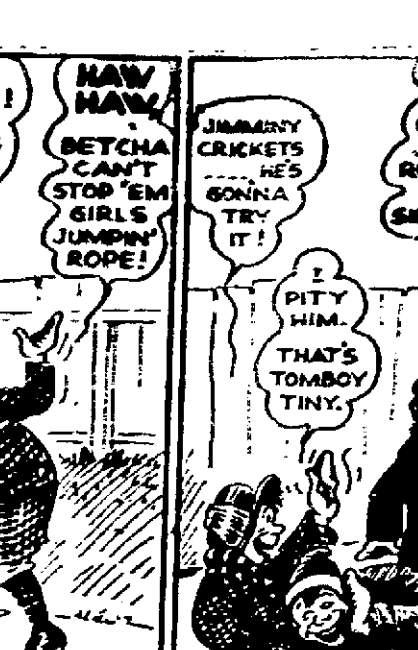

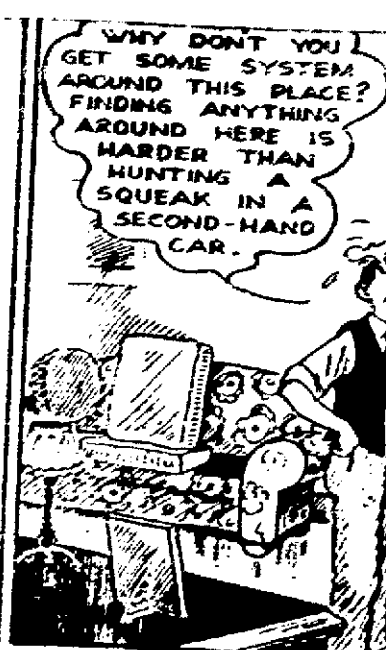

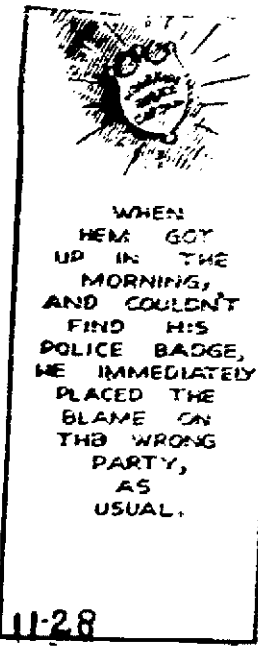

Heals quickly when you apply a little Musteroil. It penetrates to the sore spot with a gentle tingle, loosens the congestion and draws out the soreness and pain and won't blister like the old-fashioned mustard plaster.

Musteroil is a clean, white ointment made with oil of mustard. Brings quick relief from sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frost-bite, colds on the chest.

To Mothers: Musteroil is also made in milder form for babies and small children. Ask for Children's Musteroil.

GAS BUGGIES—A Chip Off the Old Block.

Points Out Danger Of Quack Fliers

An Dangerous to Public Welfare as Quack Doctors, Says Assistant Secretary of War, in Urging State Legislation to Regulate Aviation.

Albany, Nov. 28.—Declaring that quack aviators are as dangerous to the public welfare as are quack doctors, Assistant Secretary of War F. Trubee Davidson today urged city officials and Chambers of Commerce to support legislation that would drive “quack fliers” out of the state.

Mr. Davidson spoke before the morning session here of mayors and commerce organizations called by the New York State Conference of Mayors for the purpose of securing cooperative action toward the adoption of a definite state aviation policy and the enactment of air laws in harmony with federal air statutes. In addition to the cities and Chambers of Commerce, the aircraft industry, commercial air transport companies and organizations devoted to air development were represented at the meeting.

At the outset of his remarks, Mr. Davidson declared that the huge sums spent by cities in New York for airport development make it necessary to protect those investments by air laws uniform with those of the federal government.

“State Law Is Only Curb,” “New York,” he said, “should fall into line with states that cooperate with the government's efforts to rid the skies of unskilled pilots and flimsy planes. Federal laws do not apply to aircraft not engaged in interstate flying. For instance, an unlicensed pilot can go anywhere he wants to in New York in an unlicensed plane, and his ship is usually a flying coffin long overdue on the scrap heap. A state license is the only curb.

“Planes that have no license—state or federal—should not be permitted on the flying line of any municipal airport in New York. The same should apply to pilots.

“Quack Fliers Are a Menace.” Quack doctors and flimsy planes as dangerous as ships with rotten hulls. There are certain “schools of learning” long on promises and short on ethics, known as diploma mills in aviation. Their graduates constitute a distinct menace to real air progress.

“So far, it has not been possible to control the quack pilot at his source; hence, it is necessary to stop him at the field. In other words, beware of the pilot who has no license and steer clear of the plane that lacks registration numberals on its wings.

“Air regulation and the licensing of planes and pilots is essential for the protection of the public and for the promotion of commercial aviation by responsible operators of legitimate lines. The sooner we eliminate reckless and irresponsible pilots, the sooner will air transportation take its place among our great public utilities.

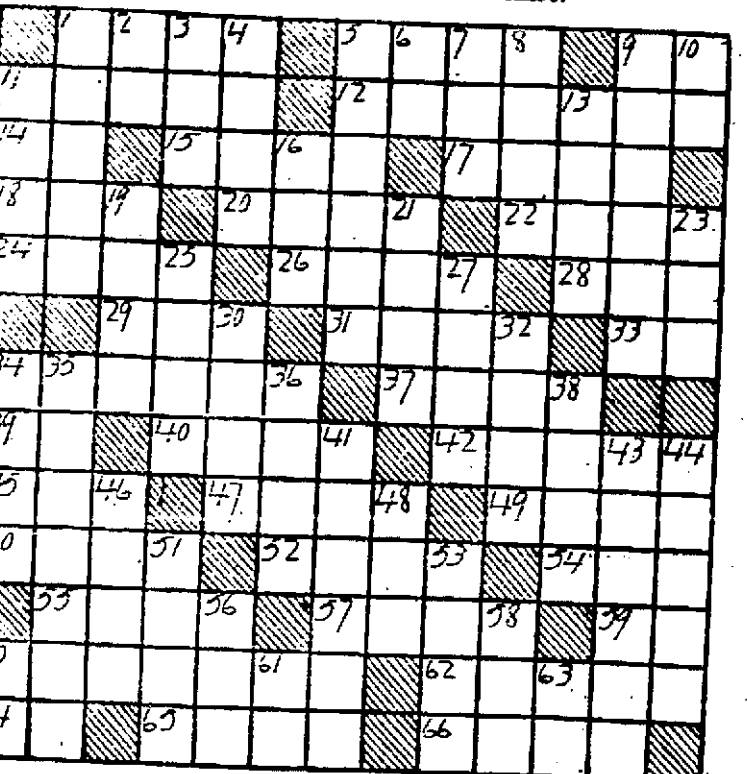

“I am confident this conference will speed action toward the adoption by the Legislature of a well considered aviation program. It is essential that such a program is well considered because aviation should be helped and not hindered by supervision. The last session of the Legislature saw the introduction of bills aiming at state regulation over aircraft. These measures were not desirable. They failed, among other things, to consider the need of unity between state and federal statutes. Commercial air line pioneers operate against enough handicaps without having to shoulder those of haphazard legislation. New York and other states should enact air laws but they should be harmonious with federal laws. It is impossible for pilots to carry law libraries in their cockpits. This they would have to do if states had varying statutes. The federal air laws have proven their value. They should be adopted by New York to meet state needs.

“The licensing of aircraft and pilots should be the first step toward the establishment of a definite state air policy. Another question to determine is the role the state should play in the development and maintenance of airports. Should this work be left entirely to the localities or should the state shoulder some of the burden? Should airports, from a maintenance standpoint, be placed on a par with highways? So far, airway development—and by that I mean airport construction—has been borne entirely by the localities despite the fact that it is open to doubt if an airport, in a strict sense, is solely a local proposition.”

Other speakers included William P. MacCracken, assistant secretary of commerce for aviation; Porter

Selling Kingston Through Freeman Advertising!

The entire structure of advertising and selling rests on the local merchant, for every sale to the consumer is either made or lost through this outlet. So quite naturally his advertising copy should be prepared with this thought in mind.

Advertising is selling through the printed word and selling has been defined as “a transaction that benefits two people,” so it can be deduced that advertising must benefit two people, the retailer and the consumer.

The advertising that really sells merchandise for the local merchant is that which tells definitely where and how the product can be purchased and this is possible only through the local newspaper.

Your own newspaper is a part of the city itself. It is the true source of information for all. Its fingers are kept at all times on the beating pulse of your town and it disseminates this information each day to its readers. There is no medium that can reach as directly into the homes of your community with as great a degree of reader interest and confidence as the daily newspaper of your town. And it is the best medium with which you and other local merchants can make your advertising produce the greatest possible results.

The Daily Freeman Covers Kingston and Vicinity Completely.

In Combination With The Semi-Weekly Freeman and Journal it Covers Ulster County and Parts of Delaware, Greene and Sullivan.

REAL ESTATE TRANSFERS.

Deeds Recently Recorded With the County Clerk.

The following deeds have been filed in the Ulster county clerk's office:

John B. VanLeuven and wife to Ina Van Leuven, tracts of land in town of Marlbtown. Consideration \$1.

Barent P. Winant and wife to William A. Van Valkenburgh and wife, two lots along Esopus creek at Leggs Mills, town of Ulster. Consideration \$1.

John H. Saxe and wife of Hurley to William J. Sewell, a parcel of land in town of Woodstock. Consideration \$1.

Joseph L. Abrahams and wife to Isaac A. Abrahams, a property on northern side of Murray street, Kingston. Consideration \$1.

Antonio Barbato and wife to Salvatore Motisi, a tract of about 45 acres of land in town of Marlborough. Consideration \$10.

Sale and Supper.

On Wednesday evening, November 30, the Ladies' Aid Society of St. Paul Lutheran Church will hold a roast pork supper and a sale at 57 Broadway. The supper begins at 5:30. At the sale fancy articles and Christmas goods will be on sale. There will also be a children's fish pond.

One Cent-A-Word Advs. Bring Results

THE NEW FORD CAR

*An announcement of unusual importance
to every automobile owner*

NINETEEN years ago we made and sold the first Model T Ford car. In announcing it to the public we said:

"We will build a motor car for the great multitude. It will be large enough for the family, but small enough for the individual to run and care for. It will be constructed of the best materials, by the best men to be hired, after the simplest designs modern engineering can devise. But it will be so low in price that no man making a good salary will be unable to own one."

"If I were starting in business today, or asked to restate my policy, I would not change one sentence or one word of that original announcement. In plain, simple language it gives the reason for the very existence of the Ford Motor Company and explains its growth.

"IN THE last nineteen years we have made 15,000,000 Ford cars and added to the world nearly 300,000,000 mobile horse-power. Yet I do not consider the machines which bear my name simply as machines. I take them as concrete evidence of the working out of a theory of business which I hope is something more than a theory of business—a theory that looks toward making this world a better place in which to live.

"The Model T Ford car was a pioneer. There was no conscious public need of motor cars when we first conceived it. There were few good roads and only the adventurous few could be induced to buy an automobile.

"The Ford car blazed the way for the motor industry and started the movement for good roads. It broke down the barriers of time and distance and helped to place education within the reach of all. It gave people more leisure. It helped people everywhere to do more and better work in less time and enjoy doing it. It did a great deal, I am sure, to promote the growth and progress of this country.

"We are still proud of the record of the Model T Ford car. If we were not, we would not have continued to manufacture it so long. But 1927 is not 1908. It is not 1915. It is not even 1926.

We have built a new car to meet modern conditions

"We realize that conditions in this country have so greatly changed in the last few years that further refinement in motor car construction is desirable. So we have built a new car. To put it simply—we have built a new

and different Ford to meet new and different conditions.

"We believe the new Ford car, which will be officially announced on Friday of this week, is as great an improvement in motor car building as the Model T Ford was in 1908.

Smart new low lines and beautiful colors

"The new Ford is more than a car for the requirements of today. It goes farther than that. It anticipates the needs of 1928, of 1929, of 1930.

"The new Ford car is radically different from Model T. Yet the basic Ford principles of economy of production and quality of product have been retained. There is nothing quite like the new Ford anywhere in quality and price.

"The new Ford has exceptional beauty of line and color because beauty of line and color has come to be considered, and I think rightly, a necessity in a motor car today. Equally important is the mechanical beauty of the engine. Let us not forget this mechanical beauty when we consider the beauty of the new Ford.

by
**HENRY
FORD**

"The new Ford has unusual speed for a low-price car because present-day conditions require unusual speed.

"The world moves more quickly than it used to. There are only so many hours in the day and there is much to be done.

"Fifty and sixty miles an hour are desired today where thirty and forty would have satisfied in 1908. So we are giving you this new speed.

*Quiet and smooth-running
at all speeds*

"The new Ford will ride comfortably at fifty and sixty miles an hour. It has actually done sixty-five miles an hour in road tests.

"Since modern conditions demand more speed, they also demand better brakes to balance this speed. So we are giving you four-wheel brakes in the new Ford.

"The new Ford will be quiet and smooth-running at all speeds and you will find it even easier to handle in traffic than the old Model T Ford.

"The new Ford has durability because durability is the very heart of motor car value. The Ford car has always been known as a car that will take you there and bring you back. The new Ford will not only do that, but it will do it in good style. You will be proud of the new Ford.

"THIS new Ford car has not been planned and made in a day. Our engineers began work on it several years ago and it has been in my mind much longer than that. We make automobiles quickly when we get in production. But we take a long time planning them. Nothing can hurry us in that. We spent twelve years in perfecting our former Model T Ford car before we offered it to the public. It is not conceivable that we should have put this new Ford car on the market until we were sure that it was mechanically correct in every detail.

"Every part of it has been tested and re-tested. There is no guessing as to whether it will be a successful model. It has to be. There is no way it can escape being so, for it represents the sum total of all we have learned about motor car building in the making of 15,000,000 automobiles.

*The new Ford will sell at
a low price*

"The price of the new Ford is low in accordance with the established Ford policy. I hold that it is better to sell a large number of cars at a reasonably small margin of profit than to sell a few cars at a large margin of profit.

"We never forget that people who buy Ford cars are the people who helped to make this business big. It has always been our policy to share our profits with our customers. In one year our profits were so much larger than we expected that we voluntarily returned \$50 to each purchaser of a car. We could never have done that if this business had been conducted for the sole benefit of stockholders rather than to render service to the public.

"No other automobile can duplicate the new Ford car at the Ford price because no other manufacturer does business the way we do.

"We make our own steel—we make our own glass—we mine our own coal—we make virtually every part used in the Ford car. But we do not charge a profit on any of these items or from these operations. We would not be playing fair with the public if we did so. Our only business is the automobile business. Our only profit is on the automobile we sell.

"WE ARE able to sell this new Ford car at a low price because we have found new ways to give you greater value without a great increase in our own costs.

"We did not set out to make a new car to sell at such-and-such a figure. We decided on the kind of car we wanted to make and then found ways to produce it at a low price.

"The new Ford car, as I have said, will be officially announced on Friday of this week. In appearance, in performance, in comfort, in safety, in all that goes to make a good car, it will bear out everything I have said here. We consider it our most important contribution thus far to the progress of the motor industry, to the prosperity of the country, and to the daily welfare of millions of people."

ELEANOR GUNN On Fashions

The Novelty in Turbans and
Brimmed Shapes From the
French Modistes

A Very Interesting Turban Is Seen at the Upper Left in a Model from Suzanne Talbot. This Is of Black Velvet and Is Trimmed in Gold Mesh Bands Inset in the Velvet. The Turning of the Corner in Earlap Effect Is a Very Novel Idea.

The Turban at the Right Is from Agnes. This Is of Brown Velvet and Is Trimmed in Red Spangled Flowers and Gold Spangle Leaves Outlined in

Gold Glass Beads on a Brown Satin

Unit. In the Center Is a Model from Louison. This Shows the Irregular or Profile Brim and Is Made of Rose Beige Felt Stitched in a Very Novel Way for the Design on the Crown. While the Crown Band Is Embroidered in Gold, Silver Spangles, and Silver Points.

At the Lower Left, Another

Brimmed Shape Comes from Lewis.

This Is a Beige Felt with Flat Fur Fitted Through the Crown and Down the Center of the Brim as Well. Two Rhinestone Flower Pins Make the Trim, One at Each Side of the Front.

The Turban at the Right Is from Marie Alphonsine. This Is a Serpolet Green Felt with the Tiers Drape and a Novel Silver Pin Across the Front.

A HAT FOR EVERY COSTUME IS NOW THE RULE, AND IT MUST BE FITTED TO THE HEAD AS CAREFULLY AS THE DRESS-MAKER FITS A DRESS.

New York—Millinery fashions are so varied this winter that it is possible for every woman to find the type of hat that suits her general style and face. There is no one smart silhouette for hats these days, even as there is no one general type of face. The hat must be a perfect frame to the face. The wise woman is the one who has discovered just what general

style best becomes her, and never deviates from it. Today one picks out the smart woman by the simplicity of her clothes, and the absolutely correct proportions of her entire silhouette.

Accordingly, we find the smartly sophisticated woman of today, spending as much time having her hat fitted and cut on her head, as she line has a great deal to do with the type of hat a woman must select, it is rumored in select millinery circles. Felts, soleils, and combinations of the two are the materials most generally chosen for hats this winter.

Touches of velvet are also important. For ornaments, pompoms, hackel pads, guinea feathers, and all types of little feather brushes are in vogue. Very seldom is a hat left entirely plain. There must be some individual trimming touch in evidence.

Small hats are preferred this season by those who can wear them, but it is interesting to note the number of smart people who run to the vagaries wider at the sides and trimmed with large jeweled, or modernistic buckles.

The KITCHEN CABINET

It means no more "commodity." But human beings just like me—Who live and love and plan and hope For greater things. And if they In dull, blind fashion, crudely planned, I shall not fail to understand. —Braloy.

LUNCHEON, OTHER DISHES

Sometimes for luncheon try this tempting combination:

Tomato Rabbit.—Put two tablespoonfuls of butter into a saucepan, and when melted add two tablespoonfuls of flour. Pour on gradually three-fourths of a cupful of thin cream and as soon as the mixture is thickened, add three-fourths of a cupful of strained tomatoes mixed with one-eighth of a teaspoonful of soda; then add two cupfuls of finely cut cheese, two eggs slightly beaten, salt, mustard and cayenne to taste. Serve as soon as the cheese is melted on hot graham crackers or toasted bread.

Ham and Noodles.—Butter an earthen baking dish, put into the bottom a layer of boiled noodles; add a layer of cold boiled ham cut into bits, then another of noodles, repeating until the dish is full. Cover with buttered crumbs, dot with butter and bake in a moderate oven until hot.

California Mince Pie.—Four one cupful of boiling water over one cupful each of apricots and prunes. Let stand three hours, remove the skins from the apricots and the stones from the prunes. Cook in the water in which they were soaked until nearly all the water is cooked away. Mix the dried fruit with one cupful of raisins, one-half cupful of minced citron, the juice of an orange, one-half teaspoonful each of cinnamon, cloves and nutmeg, and one-fourth cupful of walnut meats, one cupful of sugar and one-half cupful of almonds. Bake in two crusts.

Green Onions on Toast.—Cook the tender green onions, stems and all, and serve them buttered on toast or in a cream sauce, using three or four over each piece of toast; they are also good served with a drawn butter sauce as for asparagus.

Autobiographical Fibs

Literature by man on the subject of women is the most interesting and unreliable in the world. It is unreliable because it is autobiographical and all autobiography is fiction. —American Magazine.

Tan Pony Coat Is Among Fashions of the Season

A prominent motion picture actress poses for the purpose of showing this handsome light tan pony coat with light brown border, collar and cuffs. The cuffs are bell-shaped.

JUST TRY
WHITE HOUSE COFFEE
The Flavor is Roasted In!

"Just like those we bake in the woods"

—writes a Maine Lumber Camp Cook

Beans baked in the ground in an outdoor earthen oven that seals in all the flavors of the forest itself! Baked for hours under the dying embers of a campfire till they are tender as butter—all an even brown—succulent with the juices of prime sugar-cured pork and molasses and brown sugar!

Now for the first time beans like that can be had packaged—beans with the old-fashioned New England flavor that good home cooks are the first to appreciate.

Until you have tried them you will scarcely believe how different they are—but when you have once tasted that "baked in the ground" flavor you will never want beans any other way!

Two sizes—medium and large.

Motorists Should Know Traffic Code

Importance of Traffic Regulations.
Produce Cause of Mishaps. Can Be Overcome Only by Periodic Review of Code. A. A. A. Holds.

Washington, D. C., Nov. 25.—Literally thousands of motorists in all parts of the country are missing an opportunity to improve their driving by the important matters of safety, freedom from annoyance, and freedom from clashes with the courts by failure to know the traffic regulations of their own cities and states, according to the National Highway Traffic and Motor Vehicle Association.

The importance of the regulations, a majority of cases, is traceable to causes, the A. A. A. statement says. These are:

1. A haphazard method of keeping up with changes made in the traffic code instead of making it a matter to get a copy of the new regulations each time important changes are made.

2. Indifference to the precise rules based upon an assumption that one can get along well enough without them.

3. Ignorance of the national motor vehicle regulations are being adapted constantly to new conditions. These changes are carried prominently in the newspapers because their importance is so great. At certain periods, however, they become so numerous and are issued so rapidly that keeping up with them becomes a task that the individual motorist is unable to perform.

The result is that when hundreds of motorists in a given locality adopt this attitude, a certain group of drivers gives to the old regulations while with another adopts the new. Then there is confusion with all its attendant evils.

Keep Pace With Code.
The remedy, as seen by the national motor vehicle organization, is for the individual to take it upon himself to keep pace with every reprinting of the traffic code and study it thoroughly. In this way only, it is pointed out, can the motorist acquire a comprehensive picture of it. If he makes a knowledge of only one or two isolated, even if important, additions or modifications in the regulations, the individual is not able to see them in their important relationship to other sections of the code.

"While this point has been brought forward by the legal departments of various of the 48 A. A. A. states, in their work of providing a wide variety of cases, these departments have found themselves handicapped at times by the individual's ignorance of some of the most fundamental of traffic regulations. It is amazing to some of the municipal bodies, which have made sweeping

changes in their traffic regulations, to make them uniform to cover conditions, the number of motorists who have not taken the trouble to acquaint themselves with the new codes.

Safe and Sound Driving.
"Safe, sane and sound driving is a matter of every driver knowing precisely just what the regulations specify under a wide variety of circumstances. One driver for instance, cannot assume the right-of-way rule to be one thing and another have an altogether different view of it without paying the way for an accident. Yet this situation is a very common one.

"A modification of real importance was made in the right-of-way regulation in Washington more than two years ago. Yet a limited survey recently conducted uncovered the fact that only one in five motorists had more than a very hazy idea of the precise regulation.

"There is little excuse for the driver who is ignorant of the traffic code of his own city or state, but there is none for the driver whose indifference to the regulations is based upon a conviction that he can 'get by' if he is careful. Then in a police-patrolled section."

Principle of Wheel Developed in China

Models of two ancient Chinese war chariots based on bronze fragments, dating from about 600 years B. C. and fashioned in Peking, are on exhibition at the National Museum, Washington.

The models illustrate the development of the principle of the wheel one of the cornerstones of civilization.

The wheels of the Chinese war chariots illustrate the high degree of civilization reached by the ancients at that stage in their history. They were complicated wheels with long protruding hubs and flanged spokes to prevent the chariots sinking very far in the mud. Whether they were drawn in battle by animals or by human beings it is impossible to determine, and probably both were used, depending on the circumstances.

The fragments from which the wheels are modeled were found near Cheng Chow, Honan province, in archaeological excavations in which Carl W. Bishop of the Freer gallery was assisted. The two models were presented to the museum through the Freer gallery. They probably date from the Chow dynasty, about 500 B. C.

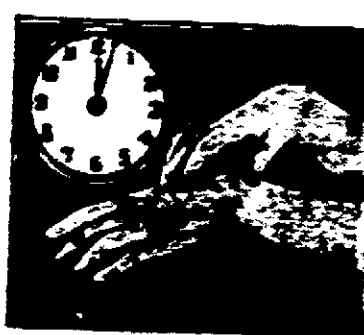

The ancient Chinese warrior, the chariots show, went into battle with considerable ostentation, his head protected by a paper or silk umbrella, much like umbrellas on farm wagons. —New York Post.

Driest Place in America

The driest place in the United States, so far as is known, is probably in the eastern part of the Mohave desert, in California. There the average annual rainfall is estimated as about two inches.

End a Cold in 1 Day!

Act quickly in a cold. It may lead to grippe or flu. Break up a cold within twenty-four hours. HILL'S will do it! Combines the four great requirements. Stops the cold in a day, checks the fever, opens the bowels, tones the entire system. Get red hot today at any drug store. **HILL'S Coughs — Colds — Cures**

Make Your Hands Soft and White

By 2 Minute Test

The day has gone when the woman who works must have rough and ugly hands. By "work" we mean anything from dishwashing, cooking, etc., to working in an office.

A marvelous new cream—**Thine Hand Cream**—makes anything you have tried—will make your hands white, soft and charming almost instantly. A two-minute test will prove this to you.

Try this amazing test. Just after your housework, rub a little of **Thine Hand Cream** into your hands. See how quickly it disappears. Put it on before you go to bed at night and marvel at the change of hands the morning brings. Money refunded if not satisfactory.

Week's Program At the Y.W.C.A.

Activities at the Y. W. C. A. for the week of November 25-December 4 are as follows:

Monday.
4:00—T.M.T.M. Girl Reserve Club.
7:00—Beginning Basketry Class.
7:30—Social Dancing Class.
8:15—Gym Class.

Tuesday.
4:00—Pep Girl Reserve Club.
4:00—Ever Ready Girl Reserve Club.
7:10—Swimming at the Y. M. C. A.
7:10—Bowling at the Y. M. C. A.
7:30—Advanced Basketry.
7:30—Advanced Class in Giftmaking.

Wednesday.
4:00—Ginga Girl Reserve Club.
6:00—Business Girls' Supper.
Amateur Stunt Night at the Y.

Thursday.
10:00—Swimming at the Y. M. C. A.
12:00—Industrial Girls' Luncheon.
3:00—Organization meeting of the Young Married Women's Club.
7:00—Basketball Organization.

Friday.
4:00—Hand Ye Leal Girl Reserve Club.
4:00—Blue Bird Girl Reserve Club.
6:00—Voice Class.
7:00—Schubert Choral Club.

Saturday.
8:00—Industrial Girls' Party.

Sunday.
4:00—Candle Lighting Vesper Service in the First Dutch Church.
The Business Girls are reminded of Amateur Stunt Night on Wednesday. It is hoped that many surprise stunts will be introduced but if any girls are willing to enter the competition and lack ideas for their individual stunts, the office will be glad to offer suggestions upon request. Four stunts are already promised for the occasion.

Every member of the Y. W. C. A. is asked to keep in mind the vesper service at 4 o'clock at the First Dutch Church on Sunday, December 4. Other new features for the week are the organization meeting of the Young Married Women's Club on Thursday, December 1, and the party for all industrial girls on Saturday, December 3.

CANDIDATES INVITE ALL VOTERS TO SUPPER

Chazy, N. Y., Nov. 25 (AP).—North Country candidates who are elected to office do more for those who voted for them than merely passing around cigars of doubtful merit to the men folk. Republican candidates in this Clinton county town decided on something substantial in the way of a thank offering for their election. They accordingly advertised they would give an orner supper at the Grange Hall to every man, woman and child in the township, regardless of what ticket they voted. Hundreds attended the supper which was one of the most successful gatherings on record in that section.

Learned the Truth

The grandmother who was summering beside a lake with some of her little grandsons had a wrinkle in her eye. "I thought when I first came here that I was tremendously popular with the little boys," she said. "Nearly every hour one or the other of them invited me to go rowing with him. Then I discovered that their mother did not permit them to go out in the boat unless an older person was with them. After learning that fact, I was not quite so puffed up over my popularity."

A Different Way

A little girl went to stay with her aunt, and gravely watched her saying her prayers the first morning. When the aunt rose to her feet again the child said:

"Auntie, do you say your prayers now as well as at bedtime?"

"Of course," said auntie. "Don't you?"

"No. I say my prayers at bedtime and in the morning I do breathing exercises."

Why are there so many charming women today?

NEVER before have there been so many charming women.

WHEREVER you go, you find them. Vivacious, happy, beautiful, delightfully dressed in the most exquisite taste.

CLEAR, pink-and-white complexion, luxurious, well-kept hair, gleaming teeth, trim athletic carriage—these are almost universal characteristics of American women of today.

WHY?

AT first thought it may sound absurd, but one of the most powerful teachers has been advertising.

ADVERTISING has helped to teach us all that the real basis of beauty is health and cleanliness. We are the greatest users of soap and water in the world.

ADVERTISING has taught us how to care for our teeth, our hair, our feet, our hands and our complexions.

ADVERTISING has taught us how to dress—how to choose colors and fabrics and becoming styles.

ADVERTISING has taught us how to talk, how to entertain.

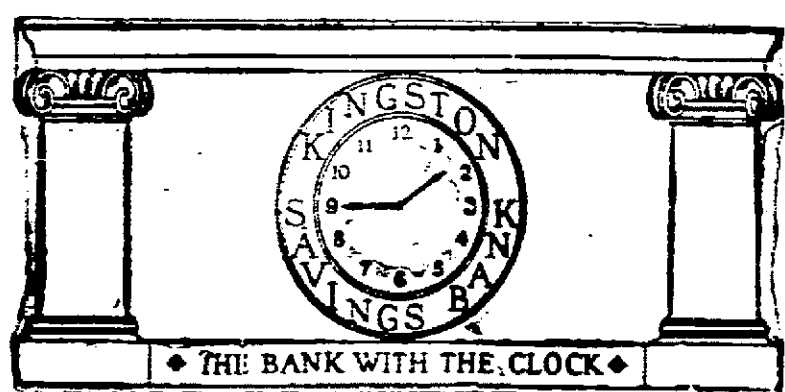

ONE reason why so many women are charming is because so many women are reading advertising. From advertising they are learning the secrets of great beauty specialists. They are getting health information of inestimable value. They are learning the secrets of becoming dress from the famous designers of Paris and New York.

Advertising is one of the biggest reasons why so many women are so charming.

Read advertising regularly.

National Race Lacrosse Added Between Georgia To Olympic Games And Pittsburgh

Georgia, With Nine Straight Wins, Will Tackle Georgia Tech, and Pittsburgh, Winners in Eight Games and Tied With One, Will Meet Leland Stanford.

New York, Nov. 25 (AP).—The annual college football season, now reaching only its final weeks from a few sections of the south and far west, leaves the national championship situation still undecided but with the race narrowed down in the opinion of most unbiased observers, to a contest between the Bulldogs of Georgia and the Panthers of Pittsburgh.

These two have their rivals and challengers for sectional as well as national honors, but the critical question that, for the present at least, they have as substantial a claim as any outfit to the main laurel wreaths.

The title hopes of each now are centered about forthcoming engagements that will determine their final rating.

Georgia, with nine successive victories to its credit and Yale among its victims, plays Georgia Tech in the classic of the South at Atlanta this Saturday. Pittsburgh, triumphant in eight games and tied only by Washington and Jefferson, journeys to the far west for the tournament of roses game on January 2 with Leland Stanford, one of the contenders for the Pacific coast conference crown.

The outcome of these battles may not end the dispute but they at least will help to clear the title atmosphere.

There are at least a half dozen other teams whose records cannot be overlooked when the final rating is posted, even though their achievements may not quite match those of Georgia and Pittsburgh.

Yale disputes Pittsburgh's claim to the eastern peak but the Eli setback at the hands of Georgia eliminates it from the national picture. Washington and Jefferson would have remained at Pittsburgh's side but for another tie, with West Virginia, on the same day that the Panthers were crushing Penn State.

Illinois, champions of the western conference, experienced only a tie with Iowa State. Likewise the powerful Texas Aggies, titleholders in the southwestern conference, came through the season with a slate marred only by a scoreless deadlock with Texas Christian University. Tennessee was tied once, by Vanderbilt, after keeping pace most of the season with Georgia. Minnesota's juggernaut also was unbeaten but twice tied, by Indiana and Notre Dame.

Smaller eleven such as Centenary in the South, and Tufts in New England, boast records clear of defeat or tie but they do not figure in the major college fold, however noteworthy their claims to distinction may be.

Centenary's ten victims, however, included such strong teams as Southern Methodist and Texas Christian.

Notre Dame's warriors set out along the national championship highway in splendid fashion but after bumping into Minnesota, Rockne's ramblers were blown out of the picture by the Army's big guns. Not even such notable triumphs as those over Navy, Georgia Tech and Southern California, could put Notre Dame back in position to dispute the national title.

CHANDLERS WON FROM COMFORTERS

The Comforter five fell before the attack of the strong Chandler team at the Y. M. C. A. Saturday night, 12-28. After a period of even fighting the defense of the Comforter team was broken in the fourth quarter when the Chandlers piled up their point column. In the first half the quintets battled on even terms, and the period ended with the winners in the lead by one point, 16-15. Chet Fox of the Chandlers was high scorer of the game with 15 to his credit. Niles of the same aggregation caged the leather for 14 points. Williams did the major scoring for the Comforters and registered 13 ironmen.

RAICHEL STAR IN ROAMERS' VICTORY

The Roamers defeated Port Ewen at Epworth Hall Saturday night, 26-25. Raichle, the flashy left forward of the Roamers, collected over half of the winning aggregation's total and led the scorers with 14 points. Van Etten of the Port Ewen team trailed him with 13 markers.

RISKO CHASES PAULINO BACK HOME

Johnny Risko of Cleveland (left), administered such a nifty plantering to Paulino Uscudun (right) in New York the other night that the Basque woodchopper decided he'd pack up and go back to Spain, where opponents don't hit quite so hard and often.

Early Grand Opera

"Eleganza," composed by W. H. Fry (1813-1874), was the first American grand opera. It was produced in Philadelphia in 1845.

All-Eastern Grid Team for 1927

Compiled by The Associated Press From Consensus of Opinion of 56 Critics and Sportswriters—Yale and Dartmouth Each Furnish Two Men.

New York, Nov. 25 (AP).—The last eleven of Dartmouth and the Yale Bulldogs that raised the big Green championship hope each furnished two men for the All-Eastern team for 1927, compiled by The Associated Press today from the consensus of opinion of 56 critics, sportswriters, and officials throughout the Northeast.

Pittsburgh's Panthers, chosen to represent the east in the Tournament of Roses clash with Leland Stanford and generally conceded an equal claim with Yale for the mythical eastern title, placed but one man on the first eleven in "Gibby" Welch, rival of Dartmouth's Al Masters for recognition as the outstanding eastern back of the season.

Princeton, while unable to provide a star for the first eleven, furnished three men for the second team. Through second team selections, Yale and Dartmouth acquired three places and Pittsburgh two. Fourteen colleges were represented by the leading 22 players.

Selection of outstanding ends appeared most difficult with a horde of fine wingmen developed on Atlantic gridiron this season. Amos, of Washington and Jefferson, and Connor, New York University quarterback, were general choices to team with Masters and Welch in the backfield. Influenced, perhaps, by the greater experience several Army and Navy stars boast through college play before entering the service academies, critics gave cadets but one place on the first team. Navy gained one second team choice.

First Team.

Player	Position

RED SHIELDS SCORE OVER DE MOLAY FIVE

With Joyce and Merritt in prime form, the Red Shields took a fall out of the Yonkers De Molay quintet at the Salvation Army Hall Saturday night, 44-27. The two Salvation players scored 17 and 14 markers respectively while Feinberg did the high scoring for the Yonkers quintet with a contribution of 10 points. The Red Shields did most of their scoring in the opening period which ended in their favor 25-7. The boys from down the river found the baskets with considerable ease in the second half when they scored 20 points and the locals 19. Bob Corregan did the refereeing.

INVITING ATTENTION TO
THE GIFT PRACTICAL

When you are choosing a gift for a woman, remember that to most women pride in the home is almost equal to pride in their more personal possessions.

These suggestions are designed for those who realize that in giving something that will make the home more beautiful or more cheerful, they are making a gift that will last for many years in the heart of the recipient.

Week's Activities
At the Y.M.C.A.

The following is the program for physical activities at the Y. M. C. A. this week:

Monday.
Gymnasium:
12:15 Business Men's Class.
4 Student B. Class.
6 Employed Boy B. Class.
7 Employed Boy A. Class.
8 Senior Class.
Swimming Pool:
1:30 Business Men.
5 Student B.
7 Employed B.
8 Employed A.
9:30 Seniors.
Bowling Alleys:
7 All alleys open.
7 Alleys 1 & 2 American League.
8 Alleys 1 & 2 National League.
8 Alleys 3 & 4 State Bowling League.

Tuesday.
Gymnasium:
4 Student A. Class.
5:15 Business Men's Class.
7 Basketball practice.
8 Volley ball practice.
Swimming Pool:
5 Student A.
5:15 Business men.
6:45 Y. W. C. A.
10 Volley ball players.
Bowling Alleys:
7 Y. W. C. A.
10 Open.

Wednesday.
Gymnasium:
4 Student B. Class.
6 Employed Boy B. Class.
7 Employed A. Class.
8 Sunday School Basketball League (4 games), Seniors.
Swimming Pool:
5 Cadets.
5 Student B.
7 Employed Boy B.
8 Employed Boy A.
9 Players from Sunday School League.
Bowling Alleys:
7 Alleys open.
7 Alleys 1 & 2 National League.
9 Alleys 1 & 2 American League.
7 Alleys 3 & 4 open all evening.

Thursday.
Gymnasium:
4 Student A. Class.
5:15 Business Men's Class.
6:30 Rotary Class.
7:15 Senior Class.
8:30 Industrial Basket Ball League (2 games).
Swimming Pool:
10 Y. W. C. A.
5 Student A.
7 Rotary Boys.
8:15 Seniors.
9:30 Players from Industrial League.
Bowling Alleys:
7 Alleys open.
7 Alleys 1 and 2 American League.
7 Alleys 1 and 2 National League.
7 Alleys open all evening (3 and 4).

Friday.
Gymnasium:
12:15 Business Men's Class.
6 Employed Boy B. Class.
7 Employed Boy A. Class.
8 Basket Ball Game.
Swimming Pool:
1:30 Business men.
7 Employed Boy B.
8 Employed Boy A.
9:30 Players from basket ball game.
Bowling Alleys:
7 Alleys all open for the evening.

Saturday.
Gymnasium:
9 Cadets.
9 Student B. Class.
10 Student A. Class.
2 Sunday School Basket Ball League (2 games) juniors.
3 Sunday School Basket Ball League (2 games) intermediates.
7 Basket Ball Game.
8:30 Industrial Basket Ball League.
Swimming Pool:
10 Cadets.
10 Student B.
11 Student A.
2 Players from junior league.
4 Players from intermediate league.
8 Players from basket ball game.
10 Players from industrial league.
Bowling Alleys:
1 Alleys open until 8:00.
7 Alleys open until 11:00.

Joy Moves the World
Joy is the mainspring in the whole round of everlasting nature. Joy moves the wheels of the great time piece of the world; she it is that loosens flowers from their buds, suns from their firmaments, rolling spheres in distant space seen not by the glass of the astronomer.—Schiller.

The Wrong Camp
Grounds

By H. LOUIS RAYBOLD
(Copyright)

THE Streeters had been "out" a month, and by that I don't mean out of jail, but on the road, in the great Out-of-doors, hitting the trail, or what you will in camp lingo. To look at them, you would know they had been out for some time. A thick coating of dirt hid the newness of duflie bags, suitcases, stove, umbrella tent, telescope case, and collapsible table, all stowed on running boards, fenders, bumpers and either side of the hood.

The latter arrangement was very awkward for Mr. Streeter when putting in oil but, as his wife said, it was one of those small inconveniences which one shouldn't mind. And she didn't.

Mrs. Streeter had been the instigator of the trip. She had had difficulty in persuading her husband to go. As for Darlene, their daughter, it required all of their combined parental authority to get her to accompany them. And it was because of her that they were any of them there.

"We must get Darry away from that plumber's boy," Mrs. Streeter had insisted. "I suggest that we take the car and go touring."

"Stopping at hotels, of course?"
"Nothing of the kind. It isn't being done as it used to be. We will put up at those lovely state parks and municipal camps you hear tell of. The Dumbars were out all last summer and they said they just rode all day long, looking forward to the camp at night, some of which had electric lights, caretakers, showers, and everything."

So here they were on this warm August day doing a mean forty-five and hoping to reach a camp the man in the chain store where they had bought some groceries had told them about. "Somebody's camp grounds or other, it says on a sign."

However, darkness, unheavened by moon or stars, for the night was cloudy, had descended before the Streeters reached their destination. Sure enough, there was the sign, on which, aided by the spotlight, they could at least make out the welcome words "camp grounds." In the background, a dark bulk, as of a tent loomed up, and a general trodden down appearance of the level ground seemed to indicate that other campers had preceded them.

Within an hour, mother, father and daughter were wrapped in slumber. Darry's sleep, to be sure, was interwoven with pleasant dreams of Charley regarding whom her heart grew fonder.

The sun had been up some time, when Mrs. Streeter awoke with a start. Then she nudged her husband. "Listen, Ed, am I dreaming or do I hear an awful lot of people outside?"

Ed turned over drowsily, roused up, and peeked through the tent flap. Then he sat up suddenly. "There are at least two hundred," he said, "sitting around and acting as if they were waiting."

"Waiting?" cried Mrs. Streeter, in a loud whisper, "waiting for what?"

"Well," groaned Mr. Streeter, "they look as if they were waiting for us to get up."

"And that canvas thing in back we thought was a tent," broke in Darry, who had been doing some peeping on her own account, "looks like a statue waiting to be unveiled."

Those storied Arabs, who folded their tents and silently stole away, had nothing on the Streeters that morning. In utter stillness and with never a glance at one another, they crept into their clothes, packed up their equipment and climbed into their car.

Just as Ed put his foot on the starter, a portly woman rushed over to them and shook Mrs. Streeter's hand violently. "We do hope we didn't disturb you, but you know we're a club made up of his descendants and we've come to dedicate this statue in his honor on the anniversary of his birthday. If you would like to stay—"

But Mrs. Streeter declined her well-meant invitation kindly but firmly. Not until they were many miles away did she open her mouth again. Then, "Well, I would like to know whose descendants they were, but I don't suppose I ever shall, for never in all my born days will I come back this way again."

"Well, I can tell you, Momma," said Darry bitterly. "It was Joshua Putnam. While she was talking to you, I looked over at that sign we half read last night and it said: 'Joshua Putnam Camp Grounds. Where Joshua Putnam made his headquarters in 1777.' We weren't camped in what we think of as camp grounds. We were sleeping in a public park, and if you say another word against Charley, I shall tell everybody at home the whole thing. I just guess it isn't any more disgraceful to marry a plumber's son than it is to hold up an unveiling celebration while you get your clothes on."

Next day, Charley received a telegram: "Dearest Charley, we are coming right home because Momma is sick of camping. She says no more camping for her. But let's run and I go camping on our wedding trip. It's all right if you go with the right party and camp before dark so you know where you're at."

"Love and kisses."

"DARRY."

SAGE SAYINGS

Love is a poor collector, but a good paymaster.

Where no hope is left, is left to fear.—Milton.

The busy man wonders how the loafer manages to live.

Time softens all things—except boarding-house biscuits.

A babe in the arms is worth two armed with toy pistols.

A fine epithet won't boost a man through the golden gates.

Better a word in season than an hour's lecture out of season.

The beginning of a college course is frequently a hazy undertaking.

There are two sides to every question—your side and the wrong side.

Contempt put an edge upon anger more than the hurt itself.—Bacon.

When one man meets another that is said to look like he usually swears.

People who borrow trouble are always anxious to turn it over to others.

Don't be ashamed to wear your old clothes until you are able to pay for new ones.

Selfish people are not selfish enough to keep their troubles to themselves.

Every woman is likely to be in the wrong until she begins to cry—then she is all right.

Fortunate is the man who doesn't go home when he has occasion to side-step temptation.

Most men would be glad to pay a large income tax for the sake of having that kind of income.

Financial and Commercial

New York, Nov. 25 (AP).—Members

of the Wall Street rate from 3 1/2 to 4 per cent, the first change in about a month toward the advance of stock prices preliminary to the first annual meeting of the stock exchange.

The higher rate, which is generally believed to be temporary, followed the calling of about \$200 million in bank loans in view of the rapid advance in prices in the last few weeks, a market has been widely predicted as a technical ground, and some of today's speculation probably was inspired by the first announcement of the new Ford car and the publication of another series of unfavorable railroad earnings statements.

Standard Industrial and rails received fairly good support on the news of selling pressure, based generally being held to a point of view, but some of the volatile speculation was a technical ground, and some of today's speculation probably was inspired by the first announcement of the new Ford car and the publication of another series of unfavorable railroad earnings statements.

Completing New Revenue Bill

Washington, Nov. 25 (AP).—With

the Seventeenth Congress convening at noon on Monday, leaders on Capitol Hill today looked forward to a last word of preparation before the national legislative machinery is set in motion.

By the end of the week it was expected that the house, ways and means committee would have the new revenue bill completed and ready for submission, with time left over for consideration of alien property legislation. The program also called for a continuation of hearings before the house food control committee in the hope that that body might be able to report its prospective measure at an early date.

A very pretty autumn wedding was celebrated at the home of Mr. and Mrs. John A. Addis at Kingston on Tuesday, November 22, when their daughter, Margaret, became the bride of Kenneth O'Brien of 11 Lenox street, at 11 o'clock.

The bridal party entered the parlor to the strains of Mendelssohn's "Wedding March" played by Miss Margaret Addis and her bridesmaids. The bride and groom were united in marriage by the Rev. Edward Kalemjian, pastor of the Kerkkonen Reformed church. The ceremony was performed under an arch of evergreens and autumn flowers. The bride looked charming in a gown of white Dutch satin and Spanish lace, trimmed with pearls and wearing a bridal veil carried with orange blossoms and carried a shower bouquet of bridal roses and swansons. Miss Violet Cutler, sister of the groom, was matron of honor and was charmingly gowned in peach georgette and carried a bouquet of butterfly roses. Chester Bonesteel, cousin of the groom, was the groom's attendant. After the ceremony a bounteous dinner was served in the dining room, after which the bride and groom left for a wedding trip in the southern states. The couple were the recipients of many beautiful and useful gifts. Mr. and Mrs. Addis will sail for Bermuda, where Mr. Cutler will be employed in the Hotel Princess.

The Girls' Friendly Society of the Holy Cross Church will hold its monthly supper and business meeting Tuesday evening in the parish house. All members are urged to be present.

The regular monthly meeting of the Kingston Hospital Auxiliary will be held Tuesday at 2:30 p. m. in the nurses' dining room in the main building.

Eddyville Prayer Meeting. There will be a prayer meeting in the M. E. Church at Eddyville Wednesday evening at 7:45 p. m. Led by Mrs. Berryann of Kingston.

DIED.
BIER—Entered into rest, Sunday, November 27, 1927, Anna Bier, wife of the late Wenzel Bier. Relatives and friends are invited to attend the funeral from the home of Mrs. Frank Radell at No. 335 Delaware avenue Wednesday morning at 9 o'clock and at St. Peter's Church, where a requiem Mass will be offered for the repose of her soul. Interment in the family plot in St. Peter's cemetery. The Society of Christian Mothers are invited to attend a prayer service at the home of Mrs. Radell Tuesday afternoon at 3 o'clock.

DEMSEY—In this city, November 27, Patrick J. Demsey. Funeral will be held Wednesday morning 9 o'clock at his residence, 31 Greenhill avenue and at 9:30 o'clock at St. Joseph's Church where a high Mass of requiem will be offered for the repose of his soul. Relatives and friends are invited to attend. Interment in St. Mary's cemetery.

MCDONOUGH—In this city, Saturday, November 25, 1927, Ellen McDonough, wife of the late Walter McDonough and mother of Patrick and Elizabeth McDonough. Funeral from her late residence, 14 Second avenue, Tuesday morning, November 29, at 9:15 and at St. Mary's Church at 10 o'clock, where a solemn high Mass of requiem will be offered for the repose of her soul. The Rosary Society will meet at the home this evening at 8 o'clock to recite the rosary. Interment in the family plot in St. Mary's cemetery.

REILLY—At Kingston, N. Y., Monday, November 28, 1927, Thomas Reilly. Funeral from the residence of his brother Patrick Reilly at Rosendale, N. Y., Wednesday morning at 9:30 and at St. Peter's Church at 10 o'clock, where a high Mass of requiem will be offered for the repose of his soul. Interment in St. Peter's cemetery. Rosendale.

Nicholas D. J. Murphy
